DEPARTMENT OF JUSTICE | OFFICE OF THE INSPECTOR GENERAL

March 2, 2022

Office of the Chief Medical Examiner

City of New York

[Redacted]

New York, NY 10016

M19-19432

Dear Office of the Chief Medical Examiner:

I am writing to request the complete Medical Examiner's case file associated with the death of inmate Jeffrey Epstein, Metropolitan Correctional Center, New York, Federal Bureau of Prisons. Specifically, please provide the OIG with a copy of the complete Medical Examiner's report, digital files including the examiner's notes, any associated reports, photos, evidence, x-rays, and any other documentation utilized by the Medical Examiner to determine Epstein's cause of death.

Please provide the documentation digitally to Special Agent [Redacted], Office of the Inspector General, U.S. Department of Justice, at [Redacted], or via digital storage mailed to him at [Redacted], New York, NY 10004.

Thank you, and if you have any questions, please feel free to contact me, or [Redacted], a [Redacted].

**OFFICE OF CHIEF MEDICAL EXAMINER
OF THE CITY OF NEW YORK**

CERTIFICATION AS A BUSINESS RECORD

I have been delegated by Barbara A. Sampson, M.D.- Ph.D., Chief Medical Examiner, to certify and authenticate records of the Office of Chief Medical Examiner of the City of New York ("OCME") pursuant to Rule 4518 of the New York Civil Practice Law and Rules.

OCME is a governmental office organized under the New York City Charter § 557 and the New York City Administrative Code §§17-201 – 17-206. All records contained in its Department of Records concerning this matter are maintained in OCME's regular course of business. OCME medical examiner files contain records generated by OCME staff in the regular course of their business, as well as documents received from other sources which are relevant to the case.

The copies provided here represent all requested documents which are contained in:

- OCME medical examiner case file #: M-19-019432 concerning decedent:
Jeffrey Edward Epstein
- OCME forensic biology case file #:

I have examined the original records maintained by OCME's Records and I attest that the records attached to this certification are a true and accurate copy of the original documents and records maintained by the OCME Department of Records.

On this date: March 3, 2022, I certify these copies as genuine and as business records of the OCME Department of Records.

REPORT OF AUTOPSY

Name of Decedent: Jeffrey Edward Epstein

M.E. #: M-19-019432

Autopsy Performed by: Kristin Roman, M.D.

Date of Autopsy: 08/11/2019

FINAL DIAGNOSES:

- I. HANGING:
 - A. LIGATURE FURROW OF NECK
 - B. PETECHIAL HEMORRHAGES OF BILATERAL PALPEBRAL CONJUNCTIVAE AND OF ORAL MUCOSA
 - C. CONFLUENT HEMORRHAGES OF RIGHT BULBAR CONJUNCTIVA
 - D. PLETHORA OF FACE AND HEAD WITH PETECHIAL HEMORRHAGES OF FACE
 - E. FRACTURES OF BILATERAL THYROID CARTILAGE CORNUAE AND LEFT HYOID CORNUA WITH ACCOMPANYING SOFT TISSUE HEMORRHAGES
 1. SEE ANTHROPOLOGY REPORT
 - F. RESUSCITATION ATTEMPTED
 1. ABRASIONS OF MOUTH
 2. ANTERIOR PARASTERNAL RIB FRACTURES
 3. HEPATIC LACERATION WITH THIN HEMOPERITONEUM
- II. ABRASIONS OF LEFT FOREARM
- III. CUTANEOUS CONTUSIONS OF WRISTS
- IV. SUBCUTANEOUS HEMORRHAGE OF LEFT DELTOID MUSCLE
- V. HYPERTENSIVE AND ATHEROSCLEROTIC CARDIOVASCULAR DISEASE
 - A. CARDIAC HYPERTROPHY (440 GM)
 - B. LEFT VENTRICLE HYPERTROPHY (1.9 CM)
 - C. RENAL ARTERIOLAR SCLEROSIS
 - D. SLIGHT CORONARY ATHEROSCLEROSIS
 - E. SLIGHT TO MODERATE AORTIC ATHEROSCLEROSIS
- VI. HEPATIC STEATOSIS (2480 GM)
- VII. CERVICAL LYMPHADENOPATHY
- VIII. REMOTE FRACTURE OF RIGHT FIRST RIB
- IX. REMOTE APPENDECTOMY (DATE AND INDICATION UNKNOWN)
- X. SEE TOXICOLOGY REPORT
- XI. SEE NEUROPATHOLOGY REPORT

CAUSE OF DEATH:

HANGING

MANNER OF DEATH:

SUICIDE (HANGED SELF)

REPORT OF AUTOPSY

CASE NO. [REDACTED]

I hereby certify that I, Kristin Roman, M.D., City Medical Examiner - II, have performed an autopsy on the body of Jeffrey Edward Epstein, on the 11 of August 2019, commencing at 9:21 AM in the Manhattan Mortuary of the Office of Chief Medical Examiner of the City of New York.

EXTERNAL EXAMINATION:

The body is received in a sealed, labeled, plastic body bag (seal #152384). The body is of a well-developed, thin, muscular, light skinned, 5'10", 196 lb man whose appearance is consistent with the given age of 66 years. The scalp hair is wavy, predominantly grey with interspersed dark hairs, has slight male pattern balding, and measures up to 3". The facial hair is cleanly shaven. The eyes have light irides. The oral cavity has intact teeth in good repair. The tongue is free of natural disease. The finger and toenails are well groomed and free of polish. Striae are on the shoulders. The genitalia are atraumatic and of a normal, circumcised man. The anus is atraumatic.

POSTMORTEM CHANGES:

There is moderate, symmetric rigor mortis of the upper and lower extremities and the jaw. Lividity is fixed, purple, and unevenly distributed on the posterior surfaces of the body. The body is cool.

SCARS:

On the back of the left shoulder is an oblique, 1-1/2", well healed, linear scar. On the right lower quadrant of the abdomen is an oblique, 2", well healed, linear appendectomy scar.

THERAPEUTIC PROCEDURES:

An endotracheal tube is in the mouth, extending into the upper airway. On the lips are multiple, focal, red abrasions. A cervical collar encircles the neck. Electrocardiogram electrodes are on the torso. An intravascular catheter is in the left antecubital fossa. An intraosseous line is in the right shin. A blood pressure cuff encircles the upper, right arm. On the chest between the nipples is a 3" x 3", irregular, yellow abrasion. Internally, there are minimally hemorrhagic, parasternal, rib fractures of right ribs #4-6 and left ribs # 5-6, approximately 60 ml of liquid blood thinly coating the serosal

surfaces of the intra-abdominal organs, and an oblique, 6.5 cm laceration of the liver to the left of the falciform ligament (artifacts of resuscitative chest compressions).

CLOTHING:

The body is received clad in a hospital gown.

INJURIES, EXTERNAL AND INTERNAL:

These injuries are described in reference to standard anatomic planes. These injuries are grouped and labeled for descriptive purposes only; no sequence is implied.

A. HANGING:

There is a depressed, focally dried and abraded, noncircumferential ligature furrow of the neck that peaks slightly on both sides of the neck, more steeply on the right side than on the left. On the right side of the neck, the furrow bifurcates anterior to the ear, with one arm that peaks behind the right ear and one arm that extends to the right side of the back of the neck. On the back of the right side of the neck at the end of the lower arm of the furrow is a 1/2" x 1", irregular, red abrasion. The furrow ranges from 13-3/4" to 15" long (measured from both ends of the furrow on the right), and ranges from 1/8" to 1/2" wide. Anteriorly, the furrow passes over the thyroid cartilage. On the upper edge of the right side of the furrow beneath the chin is an adjacent, 3/4 x 1", inverted V-shaped, linear abrasion that ranges in width from 1/8" to 1/4". Beneath the left side of the mandible is a faint, 1/2" x 1-3/4", irregular, red abrasion with multiple, interspersed, deeper, red abrasions that measure up to 1/4 x 3/8".

The face and head are plethoric above the furrow, with petechial hemorrhages of the face that are most marked within the eyebrows. There are multiple, petechial hemorrhages of the palpebral conjunctivae of both eyes, and confluent hemorrhages on the periphery of the right bulbar conjunctiva. There are faint petechial hemorrhages on the mucosal surfaces of the upper and lower lips.

Within the parenchyma of the tongue are multiple, focal, spotty, purple hemorrhages. There is diffuse, purple hemorrhage at the base of the tongue. There are no hemorrhages of the anterior strap muscles of the neck. Posteriorly, there is a single hemorrhage in the left, deep, paraspinal muscles.

Both thyroid cartilage cornuae are fractured, and the left cornua of the hyoid bone is fractured, all with accompanying soft tissue hemorrhages. See also "Anthropology Report." There are no fractures of the cervical vertebrae.

B. OTHER INJURIES:

On the back of the left forearm is an oblique, 1", linear, red, abrasion with an adjacent, 1/2" x 1-1/4", faint, red abrasion. On the medial aspect of the back of the right wrist is a 1/8" x 1/2", faint, red contusion, and on the medial aspect of the back of the left wrist is a

similar, ½ x ¾", faint, red contusion. Internally, there is a deep muscle hemorrhage of the left deltoid muscle.

INTERNAL EXAMINATION:

HEAD: The scalp is without contusion or laceration. The skull is without fracture. There is no epidural, subdural or subarachnoid hemorrhage. The brain weighs 1520 gm. The brain, spinal cord, and dura mater are submitted for neuropathologic evaluation.

NECK: See "Injuries."

BODY HABITUS: The abdominal pannus is 1-1/4" thick. The body mass index is 27.

BODY CAVITIES: The pleural and pericardial cavities are free of abnormal fluid accumulations or adhesions. See also "Therapeutic Procedures."

CARDIOVASCULAR SYSTEM: The heart weighs 440 gm and has a normal distribution of right dominant coronary arteries with slight atherosclerosis (left main and left circumflex arteries, no stenoses; left anterior descending artery, multiple, focal, less than 50% stenoses; right coronary artery, multiple, focal, less than 50 to 60% stenoses). The myocardium is brown and diffusely fibrous. There is no focal fibrosis, hemorrhage, or pallor. The free wall of the left ventricle and the interventricular septum are each 1.9 cm thick, and the free wall of the right ventricle is 0.5 cm thick. The four valves and endocardial surfaces are unremarkable. The pulmonary vessels and the venae cavae are free of thrombus and embolus. The aorta has moderate atherosclerosis.

RESPIRATORY SYSTEM: The right lung weighs 560 gm and the left weighs 510 gm. Both lungs have spongy, maroon and pink parenchyma that is free of masses. The distribution of bronchi and vasculature are unremarkable. The bronchi are empty.

LIVER, GALLBLADDER, PANCREAS: The liver weighs 2480 gm and has soft, brown parenchyma. The gallbladder is unremarkable and contains approximately 30 ml of brown bile without stones. The pancreas is tan, lobular, and free of hemorrhage and mineralization.

HEMIC AND LYMPHATIC SYSTEMS: The spleen weighs 270 gm and has an intact, purple capsule and an unremarkable distribution of red and white pulp. There are multiple, enlarged, cervical lymph nodes, measuring up to 1.5 cm in greatest dimension. The remainder of the lymph nodes is unremarkable. There is no thymus. The bone marrow is unremarkable.

GENITOURINARY SYSTEM: The right kidney weighs 180 gm and the left weighs 160 gm. Both kidneys have granular, brown surfaces and otherwise unremarkable architecture and vasculature. The ureters maintain uniform caliber into an unremarkable

bladder that contains approximately 5 ml of cloudy, yellow urine. The prostate is slightly and diffusely enlarged, with marked enlargement of the verumontanum. The testes are unremarkable.

ENDOCRINE SYSTEM: The pituitary, thyroid, and adrenal glands are unremarkable.

DIGESTIVE SYSTEM: The esophagus and gastroesophageal junction are unremarkable. The stomach contains approximately 5 ml of opaque, brown fluid without recognizable food or pills. The gastric mucosa is unremarkable. The small intestine and large intestines and rectum are unremarkable. The vermiform appendix is surgically absent.

MUSCULOSKELETAL SYSTEM: See "Therapeutic Procedures." On the anterior, inner surface of the right, first rib is a slightly displaced, healed, fracture callus. The vertebrae, clavicles, remainder of ribs, and pelvis are without fracture. The musculature is well developed and normally distributed.

MICROSCOPIC DESCRIPTIONS:

Tissue or Organ x # of fragments and/or levels (#= slide ID number)

Histology # HT19-003396

HEART x 2 (#2): Myocardial and perivascular fibrosis. Slightly hypertrophied myocytes.

LUNG x 5 (#3,4): Slight patchy emphysema.

LIVER x 1 (#1): Steatosis involving approximately 50% of hepatic parenchyma. Slight periportal fibrosis. Marked congestion.

KIDNEY x 1 (#1): Arteriolar sclerosis. Congestion.

TESTES x 2 (#5,6): No pathologic abnormality.

TONGUE x 1 (#7): Intramuscular and fascial hemorrhages consisting of intact erythrocytes.

MUSCLE ADJACENT TO HYOID BONE x 1 (#8): Intramuscular and fascial hemorrhages consisting of intact erythrocytes.

LEFT POSTERIOR NECK MUSCLE x 1 (#9): Intramuscular and fascial hemorrhages consisting of intact erythrocytes.

LEFT DELTOID MUSCLE x 1 (#10): Intramuscular and fascial hemorrhages consisting of intact erythrocytes.

TOXICOLOGY:

Specimens are submitted for toxicologic analysis. A separate report will be issued.

FORENSIC BIOLOGY:

Blood spot card, clippings from right and left fingernails, and swabs of the back and front of neck and right and left hands are submitted.

NEUROPATHOLOGY:

A separate report will be issued.

ANTHROPOLOGY:

A separate report will be issued.

EVIDENCE:

Received separately are a ligature and clothing. The items are examined, photographed, and submitted to Evidence. See also "Additional Autopsy Notes".

RADIOGRAPHY:

Post-mortem radiographs are taken.

PHOTOGRAPHY:

Autopsy photos are taken.

This report is reviewed by Dr. Jason K. Graham, First Deputy Chief Medical Examiner.

Detailed Findings:

Examination of the specimen(s) submitted did not reveal any positive findings of toxicological significance by procedures outlined in the accompanying Analysis Summary.

Unless alternate arrangements are made by you, the remainder of the submitted specimens will be discarded one (1) year from the date of this report; and generated data will be discarded five (5) years from the date the analyses were performed.

CERTIFICATION: Pursuant to New York Criminal Procedure Law Section 190.30(2), I certify that this report was made by me or is a true copy thereof for testing conducted at NMS Laboratories. I further certify that I am authorized by NMS Laboratories to make this certification.

Analysis Summary and Reporting Limits:

All of the following tests were performed for this case. For each test, the compounds listed were included in the scope. The Reporting Limit listed for each compound represents the lowest concentration of the compound that will be reported as being positive. If the compound is listed as None Detected, it is not present above the Reporting Limit. Please refer to the Positive Findings section of the report for those compounds that were identified as being present.

NEUROPATHOLOGY REPORT
CASE NUMBER: M-19-019432

NAME OF DECEDENT: EPSTEIN, JEFFREY EDWARD

(AUTOPSY PERFORMED BY DR. ROMAN ON 8/11/2019)

MACROSCOPIC EXAMINATION (PERFORMED BY DR. FOLKERTH, WITH DR. ROMAN IN ATTENDANCE, ON 8/20/2019):

The unfixed brain weighs 1520g (expected, 1200-1500g). Examination of the fixed brain (minus the left occipital pole, removed at the time of autopsy for possible toxicology) shows normal leptomeninges. No contusions, stigmata of herniation, or other surface abnormalities are seen. External brainstem landmarks and cranial nerves are normal. Vessels at the base are distributed normally, and have no atherosclerosis. The cerebellum is normal.

Coronal sections of the cerebral hemispheres reveal normal cortical ribbon, white matter, and deep gray nuclei. There is no midline shift. Hippocampi are symmetrical and of normal volume. Ventricles are normal in size and appearance.

Axial sections of the brainstem and cerebellum *en bloc* show the substantia nigra and locus ceruleus to be well-pigmented. The aqueduct and fourth ventricle are normal. Cerebellar cortex, white matter, and dentate are normal.

Cranial dura from the convexities, tentorium, and base shows falcine ossification (comment: common age-related finding). The venous sinuses and tributary (bridging) veins are patent.

Spinal cord and dura from upper cervical to cauda equina levels show no abnormality, externally or on midsagittal section.

PHOTOGRAPHS: YES

MICROSCOPIC EXAMINATION: NO

M-19-19432
ANTHROPOLOGY

BACKGROUND:

On 12 August 2019, the Forensic Anthropology Unit received a hyoid and larynx that were removed by Dr. Kristin Roman during the autopsy of a 66-year-old male and submitted for a trauma analysis. The hyoid was cleaned in warm water and a combination of sodium bicarbonate and enzyme detergent. The larynx was placed in formalin and the soft tissues of the thyroid and cricoid were manually removed to facilitate examination. The specimens were examined radiographically, macroscopically and microscopically.

Figure 1. Diagram of the submitted hyoid and larynx (anterior view) showing the approximate fracture locations (red lines).

Figure 2. Overview of the submitted hyoid bone exhibiting a fracture to the left greater horn (white arrow).

FINDINGS:

Hyoid

The greater horns of the hyoid are bilaterally fused to the hyoid body. There is a fracture of the left greater horn (Figures 1 and 2).

The Forensic Anthropology Unit is accredited in Forensic Inspection under ISO/IEC 17020 issued by ANSI National Accreditation Board. Refer to certificate and scope of accreditation FI-0014.

Larynx

The thyroid cartilage is almost entirely ossified and the cricoid cartilage is partially ossified. The thyroid exhibits two fractures: one to the left superior horn and one to the right superior horn (Figures 1 and 3). The fractures to both the left and right superior horns occur just superior to the junction with the lamina. The cricoid does not exhibit any fractures.

Figure 3. Microscopic (10x) posterior views of fractures (white circles) to the left and right superior horns of the thyroid.

SUMMARY:

The hyoid bone exhibits a fracture of the left greater horn. The thyroid exhibits two fractures: one to the right superior horn and one to the left superior horn.

Investigation Report

Name of Decedent: **Epstein, Jeffery** Case No: **M-19-019432**
Report Date & Time: **August 11, 2019 00:31** Disposition: **ME Case**
Place of Death: **170 William Street, New York, NY, 10038** Date & Time of Death: **August 10, 2019 07:36**

Case Synopsis

The decedent is a 66-year-old White male prison inmate who was found hung by the neck within his cell and was later pronounced dead at the hospital ED despite resuscitative efforts. The NOK does not object to an autopsy. PMH information is pending on receipt of the correction facility medical health services records.

Subjective Findings

As per Dr. Dajer of the ED at New York Presbyterian Lower Manhattan Hospital (212) 312-5070 on 08/10/2019 EMS found the decedent to be in cardiac arrest and with ligature markings of the neck following an unknown "down" time at the Metropolitan Correction Center (MCC). The decedent was intubated and was given epinephrine x 4 and bicarbonate x2 along with CPR. ACLS was continued at the ED. The decedent was given an additional epinephrine x 1 and bicarbonate x 1. However, the decedent was in asystole by cardiac monitor and in cardiac standstill by ultrasound. He was pronounced dead at 07:36 hours. Ligature markings of the neck were observed by Dr. Dajer in the ED as well as by EMS. However, no ligature material was observed by either EMS or by Dr. Dajer in the ED. No bloods were drawn and no fentanyl was administered in the ED or by EMS.

Dr. Dajer was instructed to submit to OCME a completed ME Clinical Summary Worksheet the EMS ACR, and the ED Notes. These were received except the ACR. An email was sent to Evidence Request with cc's to Evidence Pickups and OCME Tour Commanders requesting that the ACR be obtained.

The undersigned was accompanied by Nicholas Schultz, Deputy Director of Forensic Investigations and Operations, for a MLI scene investigation. FBI Special Agents [REDACTED] (unknown contact info.), were also present at the scene conducting their investigation.

As per [REDACTED] at MCC the decedent was detained at MCC since 07/06/2019 on charges of sex trafficking conspiracy and sex trafficking of minors as inmate # 76318054. He was placed in a cell on 07/07/2019, but was moved for psychology evaluation

07/08/2019 – 07/10/2019. His psychologist was [REDACTED] (unknown contact). He was then moved to the Special Housing Unit (SHU) from 07/10/2019 – 07/23/2019. However, on 07/23/2019 the decedent attempted suicide by hanging. In the early morning hours this date the decedent's cellmate, inmate Tartaglione, was awakened by a sound and saw the decedent. He started banging on the cell door to alert the corrections officers. [REDACTED] responded at 01:27 hours and observed the decedent to be either seated or laying in a fetal position on the cell floor (unclear history) with a "loose homemade noose" around his neck made from a torn orange bedsheet. At this time the decedent was found to have erythema around two-thirds of the circumference of his neck, two inches wide, with sparing of the back of the neck. There were also some "friction marks". The decedent was transferred to Suicide Watch from 07/23/2019 – 07/29/2019. He was transferred to the SHU again on 07/29/2019 where he remained until the DOD. He was in cell # 206 originally this last time in SHU, but was switched to cell # 220 at an unknown date and time. The decedent had a cellmate, inmate Reyes. However, on the morning of 08/09/2019 inmate Reyes went to court and was released through the court. No cell mate was present at the time of the incident leading to the decedent's death.

Information was taken from [REDACTED] and [REDACTED] regarding this incident. Regular rounds of the inmate cells are conducted by the corrections officers every 30 minutes, but no longer than at 40-minute intervals. It is unknown when the decedent was last seen alive pending interview of MCC personnel. On the morning of 08/10/2019 at 06:33 hours during these regular rounds Officer [REDACTED] found the decedent hung by the neck within his cell # 220. However, the location within the cell and the position of the decedent are unknown pending interview of MCC personnel. [REDACTED] "removed" the decedent from an unknown fixed object and placed him on the cell floor. The officer started CPR. In the meantime [REDACTED] entered the cell [REDACTED] took over performing CPR and the decedent was taken to the Medical Health Services area. EMS arrived and took over care for the decedent there.

Scene Investigations/ Details

The scene was within the decedent's cell, # 220 on Tier L of the SHU within the MCC. Of the scene photos INV-Scene 003 depicts the sealed cell door to # 220. Photo 004 depicts a straight-ahead view from the now opened cell door. Photo 005 represents the left side of the room. Beyond the right-sided wall of Photo 004 the right side of the room can be viewed in Photo 009. There is bedding material strewn in the middle of the floor including a mattress, presumably from the top bunk, and orange blanket and sheets. There was a CPAP machine on the floor with an electric cord reportedly provided by the MCC staff at bedtime ~ 22:00 hours and plugged into an outlet to the right outside of the cell door. Adjacent to the toilet and sink is a small table and stool on the right side of the cell. There was a handwritten note. It was not a suicide note, but it's content vented frustration about conditions and experiences at the facility. There was a bunk bed. The mattress was removed and personal items were kept on the top bunk. Amongst these were medications and supplements including Vitamin C 500 mg, Tolnaftate Cream 1%, Vascepa Omega 3, two boxes of Acetaminophen 500 mg which were both sealed closed, Multivitamins, a sealed container of Milk of Magnesia, Methylprednisolone 4 mg Dosepak also sealed, and Docusate Sodium 100 mg. The bottom bunk had rumpled up orange bedding. There were strips of orange cloth presumably from the bedding located in different spots in the room. Included amongst these was what appeared to be a makeshift clothesline tied between the bunk bed

posts with a pair of orange underpants hung from it. Measurements of the bunk bed set are as follows: The height from the floor to the top bunk was ~ 58.5 inches. The length of the bed set was ~ 79.5 inches. The width across each bed (Photo 052 depicts the bottom bunk mattress) was ~ 25 inches. Photo 049 shows the heights of the rungs of the ladder to the top bunk.

[REDACTED] of the Medical Health Services arrived to the scene and presented the AED with defibrillator pads used on the decedent along with the "ligature", which appears to be a stripped piece of an orange bed sheet.

As per [REDACTED] the AED revealed no shockable rhythm on the decedent. The ligature was collected by the undersigned and entered into the evidence locker cage at [REDACTED] in Manhattan.

As per [REDACTED] he was made aware by MCC staff that when the decedent's cellmate Reyes left it is believed that some of the items in the cell may have been his which were not removed.

Examination of Body

N/A

Additional Information

As per [REDACTED] [REDACTED] confirmed that the decedent's NOK, his brother, Mark Epstein [REDACTED], was notified of the decedent's death. The undersigned called the brother and discussed OCME policy and procedure with regard to a ME case. He does not object to an autopsy, however, he has requested to have present a private independent physician (pathologist) as a second opinion for the findings at the OCME autopsy. Dr. Jason Graham has agreed to allow this as a courtesy to the family with the following conditions: The physician must be a Forensic Pathologist. He/She must arrive to OCME at 520 First Avenue in Manhattan before or by 09:00 on 08/11/2019. He/She must sign observer disclaimer paperwork and provide a DNA sample. Mark Epstein was made aware of this and he understood. He was instructed to call OCME with his choice of the private pathologist beforehand. He was provided with the Manhattan OCME office address, telephone number, and the decedent's OCME case number. He expressed that following completion of the autopsy he intends to have the decedent's body shipped to Florida. The visual identification process was also discussed with the brother.

Note: The decedent's cell at MCC is being held pending the preliminary autopsy results. It is requested that the assigned ME discuss the preliminary autopsy findings with FBI Special Agent [REDACTED] / [REDACTED].

Disposition: ME Case/Hospital with MLI Scene Investigation.

NOK Does Not Object to Autopsy.

NOK Plans to Retain an Independent Forensic Pathologist to Observe Autopsy.

The information provided above is true and correct to the best of my knowledge and belief.
Electronically signed by Kathleen Liggio on August 11, 2019 00:31.

Notes:

At 1230 on 8/16/19, Dr. Roman and I responded to 26 Federal Plaza to meet with [REDACTED] of the FBI [REDACTED] Unit. There we watched a short video surrounding the timeframe of the 8/10/19 incident. The video was titled 160 SW2-80 and dated 08/10/19, however we were informed the actual camera name was 116 L South. Per VCS [REDACTED], the video we watched came from the camera located near the upper level office (upper tier opposite side of the room from where Epstein's cell was located). The video captured areas outside the upper level office, some of the guard common area, and what appeared to be a small section of the staircase leading to the upper tier where Epstein's cell was located. The upper tier and cell where Epstein's cell was located could not be seen in the video. The video was blurry and the identity of the person(s) in the video were indiscernible.

Notes: Exam: Autopsy

Note Type: Outgoing Call **Department:** Investigations **DateTime:** 08/10/2019 17:39 **Entered By:** Nicholas Schultz

Notes:

MLI Liggio informed me she has been in contact with the NOK/brother. He has no objection to autopsy; however, he has requested that his privately retained pathologist (unknown who at this time) be allowed to be present to observe the autopsy tomorrow morning. I contacted Dr. Graham and he approved this request as a courtesy to the family. He informed me the pathologist needs to be at 520 at 9am tomorrow morning for security processing, swabbing and observer document completion. MLI Liggio will call back the brother and update me with the name of the private pathologist.

Case Notes

Office of Chief Medical Examiner, New York City

Case No: M-19-019432

Decedent: Epstein, Jeffrey Edward

Report Date: 08/10/2019

Report Time: 08:31

Borough: Manhattan

Notes: Following notification regarding this case, I responded to the office and accompanied MLI Liggio to Metropolitan Correctional Center. I remained with her throughout the entire MCC scene investigation.

Note Type: Scene Visit Event **Department:** Investigations **DateTime:** 08/10/2019 16:33 **Entered By:** Nicholas Schultz

Notes:

A total of four scans were performed inside cell 220 at Metropolitan Correctional Center using a Leica BLK360 scanner. At this time, due to the file size and software used, the scans are unable to be uploaded to CMS and are being held by the Anthropology Department. Scans will be made available to the medical examiner on Mon. 8/12.

Note Type: General **Department:** Pathology **DateTime:** 08/10/2019 15:06 **Entered By:** Corinne Ambrosi

Notes:

Remains checked in to Manhattan OCME facility. Full body xrays requested. L. Radulov (Xray) unable to access case due to HP nature. Emailed the following: "Recovery tag received sealed. Seal was breached by X-Ray Tech to perform radiographic procedures. Full body x-rays completed. Locked out of cms for this case. Unable to document notes". // At time of writing this note, OCME (MLI) contact has NOT been made with the brother of the decedent (Mark Epstein [REDACTED]). OCME investigations still at the scene. MLI report not in CMS. Case will be handled tomorrow per Drs. Graham, Stone and Sampson. CAmbrosi.

Note Type: Status Management **Department:** Mortuary **DateTime:** 08/10/2019 13:24 **Entered By:** Kareem Wiggins

Note Type: General **Department:** Investigations **DateTime:** 08/10/2019 09:52 **Entered By:** Kathleen Liggio

Notes:

The undersigned discussed this case with Dr. Dajer of the ED at New York Presbyterian Lower Manhattan Hospital [REDACTED] and this will be documented in the MLI Report. I attempted to call [REDACTED] at the Metropolitan Correctional Center (MCC) at [REDACTED], NY, NY seven times. Voice mail messages were left at the offices of [REDACTED] and a [REDACTED] (?). The facility telephone operator repeatedly transferred my calls to the office of [REDACTED], which was picked up by voice mail messaging, even though I explained to her repeatedly that I needed to speak to a live person. I spoke with Tour Commander Russell Czevekus and Deputy Director of Forensic Investigations/Operations Nicholas Schultz about this case. Nicholas Schultz and myself will be going to the scene for an investigation.

Note Type: General **Department:** Communications **DateTime:** 08/10/2019 09:29 **Entered By:** Sandra Sykes-Mcmikle

Notes:

Geraldine from Live On NY requested a hold according to Director of MLI unable to give them one because of this case being high profile.

Note Type: **Department:** Communications **DateTime:** 08/10/2019 08:19 **Entered By:** Shirley Canty

D. Medical Examiner Reportable Death Criteria: For each question in Section D, please select Yes or No for the case you are reporting.

The Office of Chief Medical Examiner (OCME) may choose to assert jurisdiction over deaths occurring under the following circumstances. See OCME Website for further guidance: <http://www1.nyc.gov/site/ocme/services/reporting-a-case.page>

yes no Is this death the result of a recent or old injury, accident, suicide, homicide, assault or therapeutic complication?

yes no Does the decedent have any type of head trauma such as subdural hematoma or known seizure disorder?

yes no Does the decedent have a spinal cord injury, hip fracture, burns, gunshot or stab wounds or any other trauma?

yes no Did the decedent die from an overdose or intoxication from drugs, alcohol, chemicals or prescription drugs? *unk*

yes no Did the decedent have any type of medical or surgical procedure that is known or suspected to have caused or contributed to the death?

yes no Was the decedent under police custody, detained, a prisoner or involuntarily committed for psychiatric care?

yes no Does the death pose a suspected threat to public health, such as bacterial meningitis?

yes no Did environmental temperature (high or low) contribute to the death?

yes no Was the decedent transported from his or her workplace?

yes no Is the decedent under the age of 18 years old (excluding intrauterine fetal demise)? If yes, age:

yes no Is the decedent's identity unknown?

yes no Was the decedent in apparent good health with no explanation for the death?

yes no For intrauterine fetal demise, did maternal trauma, alcohol or drug abuse contribute to the death?

The Office of Chief Medical Examiner (OCME) does not assert jurisdiction over deaths due exclusively to natural disease.

yes no By selecting "yes" I hereby certify that this death was caused exclusively by natural disease.

E. Clinical Summary: *DOB* - Complete this summary for Medical Examiner Cases only!

Please **DO NOT** complete this section for claim only or city burial cases!

Please summarize the circumstances and reasons for admissions, past medical history, diagnostic work, surgical procedures and findings for all reportable deaths. Please report any bullets, alterations of wounds and toxicology studies.

Found down at MCC. EMS initial rhythm a systole. Full ACLS, intubated w/ good BS bilat., C-collar placed. Epi 4mg, bicarb 2 amps given. 40 mins resuscitation attempt.

Complete this section for ME cases only

Arrived ED in asystole. ETT placement confirmed. w/ good BS bilat. Epi 2mg, 6 amp T amp given IO. Rhythm asystole throughout. Bedside sonogram confirmed cardiac standstill - T00 0736

MEMORANDUM FOR FILE
METROPOLITAN CORRECTIONAL CENTER

FROM: [REDACTED] Unit Manager

SUBJECT: Inmate Epstein, Jeffery Reg. No. 76318-054

This memorandum is in regards of inmate Epstein, Jeffery Reg. No. 76318-054. On August 9, 2019, I spoke with inmate Epstein concerning him making a call to his family. I told inmate Epstein I was leaving the facility around 7:00 p.m. Inmate Epstein agreed to shorten his attorney visitation to make his social call. I escorted inmate Epstein to Special Housing Unit around 7:00 p.m. I placed inmate Epstein in the shower on (G) Tier and escorted the phone for him to make a social call. I placed the phone in the first jack to the left on G tier. Inmate Epstein explain to me that he didn't have his phone set up to use his Pac and Pin number. I asked inmate Epstein who he was calling, he stated his mother. I remember dialing a number starting with [REDACTED], but the number was note notated. Inmate Epstein began talking on the phone. I told the staff to end inmate Epstein's call after 15 minutes. They complied.
