Is there a way for me to run all the identifiers at once rather than entering all of them individually?

I have not had time to work on this request as I was trying to get things set up for the Epstein productions. I will try and get to this today as I am playing catch up on a lot of requests right now. If you want you can run these searches in the database as well if you need to have the results right now.
Thank you.

Hey████
Circling back on this. Do you have an idea of when it'll be done?

████,
Would you please run a check on the WBTW Relativity database to ensure that all of the control numbers contained in the attached spreadsheet are coded "identified responsive?" And if they are not, would you change them to be marked as such. Thanks so much.
