## 2-3 Specifications/Work Statement

Items to be sent to vendor

25 - 40 – Bankers Boxes

Box Contents

There are various paper sizes in the boxes (Letter, Legal, A4, etc.)

Any documents that are in color will need to be scanned in color and documents in B&amp;W will be in B&amp;W

There is possible Glasswork for these documents

There are electronic items in the boxes (CD, DVD, etc.)

Paper is in fair condition.

The immediate need is to select a vendor that can scan and OCR all paper and produce the following:

Concordance .dat file with fields: BEGDOC, ENDDOC, FOLDER INFORMATION, BOX INFORMATION, TEXTPATH

IPRO .lfp and .opt files

Document-level OCR text (.txt) files

300 dpi Group IV tiff files, single-page tiffs which will be sequentially numbered

If folders, post-it notes have handwriting, scan writing on folders and post-it notes

Please start with control number Epstein\_HCFL00000001

The document boundaries will be determined by physical document boundaries (binder clips, staples, paper clips, etc.).

Single Page Tiff Images

Deliverables on a padlock drive or secured flash drive

Contents will be reassembled as originally received

Any electronic items will need to be given a place holder and then the documents will need to be

provided in deliverable as a native file with extracted text

Project is to be completed as quickly as possible

#### Performance

The services shall be performed at the contractor's production facility or local vendor

Pricing must be based on GSA contract

#### Confidentiality

The contractor recognizes that the USAO has and will have law enforcement interests , as well as non-privileged information obtained from federal agencies and employees , and other proprietary information (collectively "information") which are valuable, special and unique assets of the USAO. The contractor agrees that other than provided by law, he/she will at no time or under any circumstances, directly, or indirectly, divulge, disclose, or communicate information to a third party, or use it for its own benefit without the prior written permission from the USAO. The contractor may disclose information to its employees and subcontractors, who may be working on the case, in order to facilitate the testimony to be provided by the expert in person or by written report, unless notified to the contrary by the USAO. The contractor and its employees and subcontractors will protect the information and treat it as strictly confidential.

In the performance of services under this contract, the contractor, its employees and/or its subcontractors may be required to perform operations, have access to, or handle data which contain sensitive, proprietary, or privacy information or data such as, but not limited to, review or an individuals' tax records or medical records (such as patient files or prescription records) or other materials containing individual tax or medical information (such as medical utilization reports from carriers, workers' compensation claim files, personnel files, or court records which include medical or tax reports). The contractor agrees that the following additional safeguards apply to such information:

The contractor shall be responsible for safeguarding the information or data while under the control of or available to the contractor and to prevent it from being compromised, altered, damaged , lost, or improperly disseminated . The contractor shall use such information solely for purposes of the particular court case.

Access to any such information or document should be strictly limited to persons with a legitimate and compelling need for that information, such as support staff needed to assist in the preparation of testimony in person or by written report. The Contractor shall ensure that any such persons use such information solely or purposes of the particular court case and protect the confidentiality of such information.

The contractor shall ensure that all records are maintained securely so that access is strictly limited.

At the end of the contractor's engagement in this matter, all copies of such records shall be returned to the USAO.

All questions about these safeguards and the records which they cover shall be directed to the AUSA.

The confidentiality provisions of this contract shall survive any termination of this contract.

### **Conflict of Interest**

The contractor warrants that he/she is under no obligation to any other entity that in any way conflicts with this contract, that he/she is free to enter into this contract, and is under no obligation to consult for others in matters covered by this contract. The contractor shall not, during the term of this contract, perform consulting services for others in any related or similar cases within the scope of this contract but shall have the right to perform consulting services for others outside the scope of this contract.

If, for any reason, the USAO or the contractor determines that the contractor and/or an employee or subcontractor of the contractor faces a potential, perceived, or real conflict of interest, the USAO shall notify the contractor or the contractor shall notify the USAO of the potential, perceived, or real conflict of interest and the contractor and/or contract employee or subcontractor shall cease all work on or reassign the task or proceed at the discretion of the USAO. At the USAO's option, the contractor may provide an acceptable replacement.

### **Return of Records**

Upon termination of this contract, the contractor will deliver all records, notes, data or memorandum that was received from the USAO, and are in the contractor's possession or under the contractor's control and are the USAO's property or relates to the USAO's business. The contractor may properly destroy this material upon permission of the USAO.

EOUSA AI-10-1C Data Security Contract Clause for Contracts Involving the PII of 25 or Fewer Individuals (July 2016)

### **Data Security Contract Clause for Contracts Involving the PII of 25 or Fewer Individuals (July 2016)**

The following clause applies to all contracts involving the personally identifiable information (PII) of 25 or fewer individuals. PII refers to information that can be used to distinguish or trace an individual's identity, such as his or her name, social security number, biometric records, etc., whether alone or when combined with other personal or identifying information that is linked or linkable to a specific individual, such as date and place of birth, mother's maiden name, etc. PII is defined at this link: <http://www.gsa.gov/portal/content/104256>.

Contractors using information systems that are subject to the data security requirements under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) already are subject to the data security standards outlined below, and, therefore, only paragraphs (g), (h), and (i) apply.

- (a) Contractors must ensure that computer hardware is secure and shall take the steps outlined below:
  - (1) **Keep your firewall turned on:** A firewall helps protect your computer from hackers who might try to gain access to crash it, delete information, or even steal passwords or other sensitive information. Software firewalls are widely recommended for single computers. The software is prepackaged on some operating systems or can be purchased for individual computers. For multiple networked computers, hardware routers typically provide firewall protection, although the contractor must verify this.
  - (2) **Computers must be protected by username/password logins and password-protected screensavers (after 15-min. idle).** Computer accounts cannot be shared with other users. Contractors must report an incident to the EOUSA Security Operations Center at [REDACTED] within one hour if their account is accessed by another user.
  - (3) **Install and update your antivirus software:** Antivirus software is designed to prevent malicious software programs from embedding in your computer. If it detects malicious code, like a virus or a worm, it works to disarm or remove it. Viruses can infect computers without users' knowledge. Most types of antivirus software can be set up to update automatically.
  - (4) **Install and update your antispyware technology:** Spyware is just what it sounds like—software that is surreptitiously installed on your computer to let others peer into your activities on the computer. Some spyware collects information about you without your consent or produces unwanted pop-up ads on your web browser. Some operating systems offer free spyware protection, and inexpensive software is readily available for download on the Internet or at your local computer store. Be wary of ads on the Internet offering downloadable antispyware—in some cases these products may be fake and may actually contain spyware or other malicious code.

(5) **Maintain active and supported operating systems and application software.** Computer operating systems (e.g., Windows 8.0) and application software (e.g., Microsoft Word) have a lifecycle that begins when a product is released and ends when it's no longer supported. Install and maintain security updates and fixes updated to stay in tune with technology requirements and to fix security holes. Be sure to install the updates to ensure your computer has the latest protection.

(6) **Be careful what you download:** Carelessly downloading e-mail attachments can circumvent even the most vigilant anti-virus software. Never open an e-mail attachment from someone you don't know and be wary of forwarded attachments from people you do know. They may have unwittingly advanced malicious code.

(7) **Turn off your computer:** With the growth of high-speed Internet connections, many opt to leave their computers on and ready for action. The downside is that being "always on" renders computers more susceptible. Beyond firewall protection, which is designed to fend off unwanted attacks, turning the computer off effectively severs an attacker's connection—be it spyware or a botnet that employs your computer's resources to reach out to other unwitting users.

(b) You must encrypt files related to this project on your computer whenever you are not working on them using a standard software encryption product such as Winzip (Version 18.5 or later with the Windows FIPS 140-2 validated cryptographic modules enabled), Securezip, or any other product that meets Federal Information Processing Standard (FIPS) 140-2. If you do not already have a suitable encryption program on your computer, you can download one of these products easily.

(c) If the data under this contract will be accessed by more than one person, rules of behavior must be signed by users. These rules shall address at a minimum: authorized and official use; prohibition against unauthorized users; and protection of sensitive data and PII. You can comply by having all users sign these rules: 1. Keep all data and information received from the government confidential. 2. Do not leave it unattended in a place where an unauthorized person might read, copy, or take it. 3. Do not transmit it without encryption from one computer to another. 4. If confidentiality is breached, inform [name principal of the contractor] within one hour of suspected breach so the United States can fulfill its obligations.

(d) All PII data must be deleted from **all** contractor-owned devices within 15 days of contract termination or contractor completion. The Contracting Officer (CO) must receive a written certification, either via email or letter, that the contractor has deleted all PII. This bulletin outlines approved method of data destruction; please see Appendix 1, which begins on page 26: <http://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.800-88r1.pdf>.

(e) All files related to this project, and contractor-owned removable media (such as removable hard drives, flash drives, CDs, or floppy disks containing DOJ data) shall not be removed from DOJ facilities (either physically or electronically, such as by email) unless encrypted using a NIST FIPS 140-2 approved product. Please note that this requirement refers to *transferring* information between systems and storage devices (such as back and forth between contractor and DOJ attorney), while paragraph (b) above applies to data while it is on your computer.

NOTE: As an alternative to media encryption, DOJ data may be securely exchanged between contractors and USAO personnel via the approved U.S. Attorneys' File Exchange (USAfx) web portal.

(f) Contractors shall keep an accurate inventory of DOJ-owned devices used on DOJ contracts. It is understood that not all users will receive a DOJ-owned device. If equipment is provided, then the contractor, as well as the USAO providing the devices, must maintain an inventory of accountable DOJ property.

(g) If a data breach is suspected, the contractor shall, within one hour of discovery, report the breach to the EOUSA Security Operations Center (SOC) at [REDACTED].

(h) The contractor must coordinate with EOUSA and the Department on notifying any individual whose PII was, or is reasonably believed to have been, breached.

(i) The contractor must require that all subcontractors under this contract (if any) adhere to all applicable security contract requirements.

(end of clause)
