Subject: annoying but important project

Date: Sat, 20 Apr 2019 16:55:20 +0000

Importance: Normal

Hey – I have a project that's kind of painstaking, which I apologize for, but it's really important (to have it done correctly) – we've received a significant production in the Epstein case that's mostly in .zip folders, saved here:

[REDACTED]

I started trying to unzip them into that folder, but I keep getting error messages – I think each one needs to be unzipped to a desktop or local drive, and then Beyond Compare copied back into the share drive. Could you please do that for us? Anything in each particular zip file (there are 16 total) can be unzipped into a folder with the same name as the original .zip file, and then let's just put all the zip files in a separate folder so we have them just in case.

Do you have the bandwidth to do this sometime Monday? Thank you, and sorry to come to you for this rather than IT or an intern or something, we just want to make sure nothing gets lost in the various transfers. Or let me know if you're swamped Monday, too.

thank you!
