[REDACTED]

Now that we have completed our responsiveness review in the "US v Epstein (SW Returns)" database, we need to lock off access to any non-responsive materials in that database. Would it be possible to please lock off access to the 397,365 documents in that database that are **NOT** currently tagged "Identified Responsive"? That should leave just the 1,218,719 documents that are tagged "Identified Responsive" accessible to the team for use in our case.

Happy to have a call to discuss if that would be useful.

Thanks very much,

[REDACTED]
