[REDACTED]

Per our conversation, you spoke with [REDACTED] who confirmed with [REDACTED] that anything on the approved hardware list will not need further approval and we are cleared to purchase and use. We will still call the Regional Comm Tech at 9:15 am to notify him of our intent and ask any input he may have. I will check with Signet to see if we can use approved cameras instead so that will streamline the acquisition process and minimize our lead time.

Thanks,

Per our conversation, we still need to check with Central Office regarding the requirement and to ensure no further authorization is needed. The 3515 cameras are not on the approved hardware list and will need authorization by FITARA. At 9:15 am we will call [REDACTED] and let him know what our intent is and get specific guidance on actions that need to be taken to make this happen.

[REDACTED] - Please attend the call in my office so that we can all be on the same page.

Thanks,
[REDACTED]
