Thanks [REDACTED] Let me know their recording capabilities later today and if we need to get Central Office involved in procurement or technical assistance.

Signet will be on site tomorrow to try and connect the new NVR's.

I spoke with the facility manager earlier this evening. We will know more once they arrive.

So they're taking the NVR? Do we know the make/model so that as an option we could get with the vendor and get an emergency replacement?

[REDACTED] and [REDACTED] - The FBI is going to be retrieving the previous recordings from or camera system at MCC, but because we were having difficulty retrieving the recordings, they have told us the recording capabilities will be off line for up to 8-10 days while they retrieve this data. We will still have live viewing/monitoring. My question: are there options for remote recording from another location, or do we possess other equipment that can be connected to the system while the current recording capabilities are off line?

cc: [REDACTED], NER FacI Manager.
