Mark

Please pay attention to these points.

The killers think you are very interested in your brother and they also think that you are the only one who is looking for the killers of your brother.

They will kill you or one of your children before you know the killers to scare you.

I can't share this information with the police or the media, because then they will kill me.

This information is merely a deterrent.

I swear to God I am not a liar. If I didn't need money to treat my daughter, I would give you this information for free.

Please send this money. (Only \$ 25,000)(2.5 bitcoin)

Think you're doing charity, you've helped a lot before,

I swear I have this information.

By doing so, you will be saved from fear, worry and death forever.

This amount is not high for you. If I am a liar, I will be easily identified and arrested by the police. I was a policeman myself. I know that the police can easily identify my whereabouts. Through IP as well as in other ways. I'm not stupid enough to bother myself.

God forbid, if you don't pay, at least go to the police. Maybe...

Please, they know now that you have no information, if they haven't harmed you so far, it's because they thought

you had information.

Go to the police and complain. Don't get me wrong, please, your children's lives are in danger, at least think about them, they are not guilty.

You don't know when they will kill you. They will kill you before you get info

Please, please, please, please, please Don't waste so much time, take action
