Subject: RE: Information for ████

You ruined it, just tell the police,

You wasted a month on me, I gave you a lot of information. You are the most miserly person. I was a member of the police. I was fired for stealing police information. Right now, I have friends in the police and the FBI who give me secret information. My daughter is being treated for $ 25,000. It's not a lot of money for you, but it solves my problem. I also gave you information that could save your life and that of your family. Do you think they will let you go? Hahaha I see a day when you regret it. Their purpose in threatening was to find out what information you had. They don't warn you in advance if they want to kill you. Their only goal was to create fear. They will kill you the day you forget this story. I am sure, I have at least twenty years of work experience in these cases.

I'm not alone in this. Other people in the police are with me. You are no more influential than ████████████, they killed him easily. Your brother knew who killed him.

No one understood why ████ and Jeffrey and the others died. Some of them were not even found.

People from your brother's killers want to buy information from me. The name of one of them is ██████. He knows very well that if he hurts me, the information about the killings will be sent to many people and the media. He asked me if ████ had access to this information.
Now he knows that you have no information
