Importance: Normal

[REDACTED],
I am sure you are familiar with the Epstein case, we recently received the case file from MM. The USAO SDNY is requesting the case file be sent to a third party vendor so the documents can be scanned. Apparently this has been done numerous times in the past with other FBI files (see below). With a file this size I think their request makes sense as they want to have the file in a digital format for scanning, cataloguing, and indexing purposes. Does Miami have any objection to us releasing the file in its entirety so SDNY can utilize a vetted third party vendor to scan the files? I have cc'd the NYO CDC, [REDACTED], so she can weigh in on the discussion. I would like to have your concurrence before releasing the files since they belong to MM.

Thanks,
