This is all we know right now.
SDNY advised that Epstein was found unconscious in his cell with red marks on his neck. When staff was able to revive Epstein, he couldn't recall what happened. His cellmate denied knowing anything and said he was just sitting on his bunk with his earphones on. Epstein was removed from the cell and has been medically evaluated. MDC has initiated an investigation per their SOPs. The cellmate is [REDACTED]

[REDACTED] Per SDNY, the Washington Post has made an inquiry of the incident.
