Subject: Jeffrey Epstein digital forensic review

Date: Thu, 01 Aug 2019 11:50:48 +0000

Importance: Normal

[REDACTED]
Per our discussion this morning, we have numerous digital devices seized from Epstein's residence which, according to defense Counsel, has privileged items on them. As such, we need to establish a taint team to work with SDNY AUSAs on the initial review of these items.

We're seeking support for a surge of 2 people to NY for a 30 day TDY. CART said the imaging is just about done with the exception of two hard drives which are encrypted. With that said, we're hoping they could start the review in the next 7 days. I'll drill down with CART today re the size of the imaged devices and amount of TBs involved.

FYSA, a cost estimate is \$3143 per person per week. This include lodging, M&IE, \$600 flight, \$250 ground transportation (should be less if they take subway), and \$200 for extras.

We greatly appreciate the support
