It seems all of my Blacklight stuff was broken when they upgraded our SAN. I'm going to have to reprocess it all.

[REDACTED],
In all, 55 items are accounted for in all the digital evidence. 2 servers from the Island are still in the processing stage due to mechanical difficulties. 3 DVRs (1 from the NY apartment, and 2 from the Island) are being looked at by HQ. I am simultaneously doing data carving on the Island DVRs to attempt to recover deleted files. Initial work is promising. All other items have been processed and are available for review in NY.

I have so far exported files from 39 items to give to Southern for them to look at in relativity. These exports are limited to documents, spreadsheets, e-mails, and presentations. The exports do not include images or videos.

If you need any further information, or have any questions, please let me know.
