This is a case regarding a young girl, [REDACTED] who was brutally sexually assaulted, murdered, and dismembered in August 2016. Initial information indicated that her mother [REDACTED], friend [REDACTED], and friend [REDACTED] all participated in the homicide. Further initial information included that [REDACTED] had been drugged with methamphetamine and might have been prostituted or been a victim of child pornography by her mother.

[REDACTED] and [REDACTED] were all arrested by Albuquerque Police Department on a variety of charges. FBI opened a child pornography investigation and has provided significant assistance to APD throughout the investigation. [REDACTED]

█████, and █████ have been in custody since the incident and it has garnered significant press coverage.

Just learned that █████ will plead guilty this afternoon to Child Abuse Resulting in Death and █████ will be released from custody. Investigation determined that █████ facilitated her daughter's death by creating the situation. However, neither █████ nor █████ were present when the homicide and other crimes occurred. Forensics found a DNA sample that excluded █████. APD will also announce that a John Doe has been indicted as the source of the DNA.

█████ will remain in custody. APD has obtained authority to bug her cell because they expect she will explode when she hears about █████ and █████ and will likely make incriminating statement. █████ is expected to be sentenced to 12 - 15 years.

FBI is not likely to feature prominently in press conference, which is scheduled for 2:00 PM today.
