The password to the plist file is the number 1... try that now.

Thanks

I hope we can be a miracle workers again! (crossing fingers here)... We worked on a Filevault2 case (back in Sep 2019) and recovered a few passwords for you. "Irving" and "Konigsberg". Did you try these?

[REDACTED]
Please check on this request as it should be on [\hqu-crypt](#) website I presume?

[REDACTED]
Anything to add?

Thanks,

TRANSITORY RECORD

[REDACTED]
Back in September, I submitted a plist from an iPad backup for decryption from the Epstein case (31E-NY-3027571) through the automated site. I have yet to hear back, I checked the status, it says "pending". The powers that be are poking at me. Got anything I can tell them? Any help is appreciated, and, BTW, you guys always seem to work miracles for me. Thanks.
