SA [REDACTED]

- In summer 2019 after search of JE's NY residence, [REDACTED] and [REDACTED] sat together over the course of multiple hours (could have been across multiple days, but [REDACTED] not sure) and copied all CDs seized from JE NY house onto computers in the FBI NY Office's lab.
- Initially just saved the files onto the computer. For each CD, [REDACTED] created a folder on the [REDACTED] computer with the name of the label on that particular disc. Then saved all images from that disc in the correspondingly named folder.
 - For example, if a CD was labeled "ABC," then [REDACTED] created a folder on the FBI computer entitled "ABC," and saved all files from that CD into that folder.
- After finished saving all images from all the CDs in that folder structure, [REDACTED] and SA [REDACTED] asked other agents (SA [REDACTED] or SA [REDACTED]) to upload the photos from the computer into Griffeye (software FBI uses to review images). The next morning, [REDACTED] saw that the images were all loaded into Griffeye.
- [REDACTED] still has original folder structure the way she and SA [REDACTED] saved the images onto her computer, so she can check images in Griffeye against those folders and confirm what disc each image came from.
- [REDACTED] will review the following government exhibits to confirm which CD each came from:
