Sounds like a positive relationship.

Thanks guys....

Hello Steve.

I am confident that we will have the approval before the call. Mr. [REDACTED] gave me a verbal confirmation when we spoke on the phone this morning.

He is at MCC today and I will recontact him if need be.

Thanks,

[REDACTED]

Mr. [REDACTED]:

If Mr. [REDACTED] confirmation doesn't come in time for the 1pm call today we can make ourselves available on Friday or the next available time for you to hold the call. On the call from SigNet will be Justin Houston (who runs the tech support/ installation department for the FBOP projects) and is most familiar with the MCC New York DVR system, myself Steve Smith and potentially Bill Keller, President of SigNet.

Mr. [REDACTED],

As per our telephone conversation, I am requesting your approval to have SigNet Technologies personnel to take part in a conference call with the FBI Laboratory.

The conference call is regarding the Epstein investigation at MCC. The call will focus on the DVR systems and server that were seized from MCC.

Please give me a call with any further questions or concerns.

Respectfully,

[REDACTED]

Prior to the call we need to follow protocol and receive authorization from the FBOP to discuss site specific sensitive security related information. The person you need to discuss this with is Mr. [REDACTED] with the FBOP. If this authorization can come in time for the 1pm call today we will be on it, if not it will need to be rescheduled. His info is below:

Steve,

Thanks for reaching out. We received a DVR in an ongoing case and we were informed that [REDACTED] was the individual who helped install the system and who helps maintain it from time to time. It is our hope that by speaking with him we can better understand the setup on site.

At this time I do not think we need to have an engineer on the call, but if it turns out that we do we would be glad to work with you on having a follow up call.

Thanks

████ informed me you would like to have a call tomorrow, In an effort to have the right people on the call, could you provide the basis for the call and information that you desire? We can reach out to the manufacturer and get an engineer on the call if it would be of help. Let me know so I can make the proper arrangements.
