All,

This was released today....

Cameras outside Jeffrey Epstein's jail cell sent to FBI crime lab for analysis (New York Post- Celona and Perez)
Authorities have sent two cameras that malfunctioned outside of Jeffrey Epstein's Manhattan jail cell — where he supposedly hanged himself — to an FBI crime lab for examination, according to law enforcement sources. The cameras were positioned within view of the accused sex trafficker's cell, but the footage that they captured was said to be unusable. People familiar with Epstein's suicide investigation told the Washington Post it was unclear what caused them to malfunction. Epstein was found unconscious inside his cell on Aug. 10. The medical examiner ruled the convicted pedophile's death a suicide by hanging — a claim that his lawyers have questioned.

Sources told The Post on Wednesday that the two cameras outside Epstein's cell were sent to the FBI's major crime lab in Quantico, Virginia, to be analyzed by agents.

This has EM asking questions....

We know the entire DVR systems came here which is what CART is working on. What we want to clarify is that the above wasn't part of the priority pull that NY CART did and they made this determination based upon the videos they pulled off. Please reach out to your contacts and let us know ASAP what you find out.

Thanks!
