Good afternoon [REDACTED]

C-20 is seeking CART assistance in attempting to open and review 46 audio files from a CD.

If we bring the CD over today, is this something your team can help with asap?

Thank you, [REDACTED]

C20 received the hard copy today. We attempted to review the 46 audio files from BOX 001_CDS; CD09 but unfortunately those also would not open. For your information, all the file names start with "Grand Jury" and are followed by what appears to be the date 19 July 2006 and a numerical sequence that is similar to the structure used on the other PBPB audio files.

Thanks, [REDACTED]

FYSA.

Thanks team – let us know if it works from the hard copy when you get it.

Sir,

Attached is the review of the Epstein 1A **audio** files sent via Teleporter by IMD on 5/5/2025. (We have not yet received the overnighted hard copy.)

Summary of 1A audio:

- Law Enforcement interviews
- Law Enforcement controlled calls and FBI UCE calls/meets
- Music albums/tracks
- Duplicates of many of these files due to case overlaps

Note: We **could not review** file BOX 001_CDS; CD09 as none of the 46 audio files would open from the CD burned from the Teleporter link. Hopefully, they will launch from the IMD hard copy.

Thanks,
