(U//FOUO) CNBC: Jeffrey Epstein Dies by Suicide a Month After Arrest in Child Sex Trafficking Case by Dan Mangan, Emma Newburger, and Spencer Kimball: Jeffrey Epstein, the wealthy financier criminally charged last month with child sex trafficking, has died by apparent suicide. Epstein, 66, hanged himself in Manhattan's Metropolitan Correctional Center, where he was being held without bail, the sources told NBC News. He was found at 6:30 a.m. Saturday. He was transported by the FDNY-EMS from the jail to New York Downtown Hospital. When they arrived, Epstein was in cardiac arrest, and subsequently pronounced dead by hospital staff. The FBI is investigating the incident. Epstein was being held without bail in the jail since his arrest in early July at an airport in northern New Jersey after arriving there on his private plane on a flight from Paris. (Fee comment: He was on suicide watch?!?! I'm not a big conspiracy theory buff, but man, people will have a field day with this one given his many rich and powerful 'friends.')
