New photos are the highly confidential responsive material. They were all obtained through sealed search warrants, so yes, also sealed.

Happy to answer any questions anytime. Have a safe trip back. And good luck!

Thank you very much ████████.

For the new photos with people, which category should I place this into the binder: government sealed? Highly confidential responsive material?

And what is the caveats for the highly confidential? Is this section sealed as well? Trying to ensure the difference between the sections in the binder.

Thank you again,

████████
