Hi [REDACTED],

This is the thumbdrive that contains the photos being referenced.

Can you please confirm that this cannot be located within ODAG?

Our NY colleagues are traveling into the city from Long Island to recreate the folder and I'm hoping to save everyone time. Estimated time to travel, recreate folder, download onto a new thumbdrive and coordinate delivery is about 6-7 hours.

[REDACTED],

Our Deputy's Chief of Staff provided the thumb drive directly to the DAG yesterday, as I understand he was in our building for a briefing.

[REDACTED]
If DOJ needs these today, we need to determine how best to get them over. If it can wait until tomorrow, I will take it to the threat brief [REDACTED].

Good morning [REDACTED],

Our Deputy asked we compile unsealed photos from both the trafficking and suicide cases to provide on a thumb drive. These photos are all contained within materials the FBI previously submitted. My colleague [REDACTED] will be bringing a thumb drive when he heads over for the AGs morning operational brief.

Additionally, our OTD team is ensuring all videos from the same camera - both raw and refined - have the exact same run time to the second. They are confirming this and will provide a new link if there is a change.

Good afternoon [REDACTED],

To close out the last of the pending questions, the estimated total size of materials provided to DOJ is approximately 377GB, to include documents, images, video and audio files.

Good morning,

Update and final for #2 below.

Term: Refined Video

Description: increased the contrast, balanced the color and slightly improved the sharpness of the edges. These types of refinements are typical for video of any quality or resolution. These refinements allow the human eye and brain to interpret the video as clearer, richer, and more detailed. None of these steps can re-create detail that was never captured. This is standard for video refinement.

Will have #1 confirmed on Monday.

Subject: Epstein Materials: Questions

Hi [REDACTED],

I wanted to provide an update on the three questions we discussed yesterday:

1. Total Data Size (estimated) of the totality of what was delivered to DOJ from February 2025 – May 2025.
 1. Paper Documents
 2. Photo Scans / Images
 3. Audio / Video

Status: will have by Monday.

2. Terminology to use to differentiate between MCC videos and 1-2 lines description of work done
 - 1.

Status: The tech team is deciding between two terms to use ([REDACTED])

Description of work done: increased the contrast, balanced the color and slightly improved the sharpness of edges. These types of enhancements are typical for video of any quality of any resolution. These types of enhancements allow the human eye and brain interpret it as clearer, richer, and more detailed. None of these steps can re-create detail that was never captured. This is standard for video enhancement.

3. Date FBI closed the suicide investigation

90A-NY-3151227 encompassed a deferred prosecution agreement for two guards executed on 05/21/2021, and was closed on 12/5/2022.
