**Subject:** Re: Epstein Materials: Questions

[REDACTED],

Are the photos of the evidence - tables, toys/devices)etc - sealed under protective order?

Or are these evidence photos that just haven't been publicly released?

**Subject:** Re: Epstein Materials: Questions

Hi [REDACTED],

It is still needed.

The binder in hardcopy is with the DD. The thumbdrive in that binder was given to the DAG by Jimmy on 6/5 but ODAG cannot locate in the time-pressed day they have received orders to prepare for release.

Although they will not released sealed photos, we are proceeding with providing them digital contents of the binder in two categories - sealed and unsealed, as the Director asked. DOJ will make the determination of what they proceed with.

Thank you and your team for everything. I know this is repetitive and our bosses are aware and repeating same. Thanks for having the folders accessible - I'll send names from DOJ under separate email.

I'm told that whatever was on the original thumb drive is not what's contemplated for release. So we don't need it reproduced in a drive or by Share Point. I'm told there is another category of material, it's just not what was originally on the drive.

Hi [REDACTED],

This is the thumbdrive that contains the photos being referenced.

Can you please confirm that this cannot be located within ODAG?

Our NY colleagues are traveling into the city from Long Island to recreate the folder and I'm hoping to save everyone time. Estimated time to travel, recreate folder, download onto a new thumbdrive and coordinate delivery is about 6-7 hours.

Good morning [REDACTED],

Our Deputy asked we compile unsealed photos from both the trafficking and suicide cases to provide on a thumb drive. These photos are all contained within materials the FBI previously submitted. My colleague [REDACTED] [REDACTED] will be bringing a thumb drive when he heads over for the AGs morning operational brief.

Additionally, our OTD team is ensuring all videos from the same camera - both raw and refined - have the exact same run time to the second. They are confirming this and will provide a new link if there is a change.

Good morning,

Update and final for #2 below.

Term: Refined Video

Description: increased the contrast, balanced the color and slightly improved the sharpness of the edges. These types of refinements are typical for video of any quality or resolution. These refinements allow the human eye and brain to interpret the video as clearer, richer, and more detailed. None of these steps can re-create detail that was never captured. This is standard for video refinement.

Will have #1 confirmed on Monday.

**To:** [REDACTED] (ODAG) (JMD) <[REDACTED]>  
**Subject:** Epstein Materials: Questions

Hi [REDACTED],

I wanted to provide an update on the three questions we discussed yesterday:

1. Total Data Size (estimated) of the totality of what was delivered to DOJ from February 2025 – May 2025.
  1. Paper Documents
  2. Photo Scans / Images
  3. Audio / Video

Status: will have by Monday.

EFTA00164894

2. Terminology to use to differentiate between MCC videos and 1-2 lines description of work done

1.

Status: The tech team is deciding between two terms to use ( [REDACTED] )

Description of work done: increased the contrast, balanced the color and slightly improved the sharpness of edges. These types of enhancements are typical for video of any quality of any resolution. These types of enhancements allow the human eye and brain interpret it as clearer, richer, and more detailed. None of these steps can re-create detail that was never captured. This is standard for video enhancement.

3. Date FBI closed the suicide investigation

90A-NY-3151227 encompassed a deferred prosecution agreement for two guards executed on 05/21/2021, and was closed on 12/5/2022.

[REDACTED]
