

Subject: FBI E-mail Update

Date: Tue, 29 Nov 2016 16:06:42 +0000

Importance: Normal

The FBI has located approximately 1900 potentially responsive emails, from the email accounts of S/As Kuyrkendall and Richards, on the FBI Net Server, and approximately 200-250 emails on the Unclassified Net server. The search terms included "Epstein," so it was overinclusive.

Since some of the emails on the FBI Net Server may include classified documents, I will be going to the FBI field office in Miramar to review the emails, once the FBI IT section can package up the emails and send them down to the Miramar Office.

I'm actually heartened that so many emails were located, from so long ago.
