Lovely talking to you as always  
Just want to confirm that I would like you to look to sell options against my stock to generate income  
And to judiciously continue to sell into an up market  
I want to be in cash and have as little exposure to stocks as possible. Cash is king and there will be a time to  
jump back into the market but it is not yet  
I don't need to have balanced portfolio so keep working me out of exposure to stocks where sensible –  
obviously I will remain with some just keep working my portfolio please  
Thank you  
G
