Dear Fraser Ellis, MP,

I am contacting you to submit a report for your review and consideration to be submitted in the up coming Country meeting involving Government concerns of Community issues and community members community issues and concerns within our township of Kadina. Unfortunately I will not be able to attend this up coming meeting and am requesting following your review and consideration of the submitted report and material you will be able to raise my concerns yourself with the Government sources visiting our district and will be considered as a concern of Public Safety issues and concerns to be addressed.

As detailed in the reports I do believe that these issues raised are of importance to this community as Public Safety issues and concerns and as a member of this community I am currently experiencing these raised issues which I feel is affecting my life here in Kadina as a community member in an adverse way to my life style and safety, which had inadvertently affected multiple areas of my life and has forced me to live my life here in Kadina with caution and a form of isolation in my place of residence, which I feel is a real issue of concern and should not be a factor in ones life.

I would appreciate your consideration of this raised issue of my life being affected by these issues here in Kadina and would appreciate your consideration in assisting me by submitting the submitted reports and material for further consideration by the Government member attending the up and coming Country Meeting to be held in Kadina.

Further to this contact as detailed in the previous contact I will contact you soon to discuss the idea submitted regarding the walking trail development and idea I suggested regarding tourism ideas in this area.

Yours Sincerely
