Subject: Ghislaine Maxwell/Jeffry Epstein

It was nice talking with you. I called to report the following three items.

1. While going to meet political candidate, Bill Richardson, in Albuquerque at a hotel in the fall of 1982, I met Ghislaine. She was a bright, beautiful college girl who had graduated from Oxford University and a pilot. I was invited to see a ranch near Santa Fe, but I refused because I was both married and unable to afford the property. She pointed out her boyfriend, Jeffry, coming into the room, I left. 1982 is roughly a decade before most people thought she was in the United States. Within a week, I was warned that she was a spy and to stay away from her. Years later I also heard that she is a submarine pilot. Another decade of abuse is possible.

2. A second black book that was found on the streets of New York is now reported on the internet. [EXHIBITS STM UNDISPUTED FACTS.PDF \(epsteinsblackbook.com\)](https://www.epsteinsblackbook.com) It has Ghislaine's siblings in England and of course she is one of the daughters of Robert Maxwell, publisher. Two of her sisters lead a company for USDOJ software. A backdoor to the software is suspected. Robert was given a state funeral in Israel after his tragic death. I suspect Robert, Ghislaine, and Jeffery were all Mossad agents trying to blackmail leaders in the political and financial world. At the end of the second black book an organizational chart details his East 65th street operation with potential co-conspirators and the physical location of the apartment for models. This chart may help your investigation and your case.

3. While visiting my brother in the late 1980's, we were driving north of Manchester, NH on I-95. I looked from the passenger seat to the car in the next lane at saw Ghislaine. I wondered what she was doing in the woods of NH as they only seemed to appreciate big cities like London, Paris, New York, Miami, and Santa Fe. We followed their car from a distance to the house where you arrested her two years ago, but did not enter the driveway and drove on. I remember "Tucked away" laser engraved on a rock at the entrance. Laser engraved rocks are not common. Ownership of this house over the years may be complicated. The price(\$235,000) paid several years ago seems too low for a large house and an 30-40 acres of land.

In confidence be careful,

Mark V. Iverson
