

NON-SECURE PLACEMENT HOME

The project was to design a Non Secure Placement home in Brooklyn, New York, for 12 children between the ages of 10 and 17 years. In order for the children to function in a healthy manner in society the home needs to afford them the time to grow within themselves and as part of a community.

BOUNDARIES THROUGH SPACE

The concept for the project is “The Privacy Continuum - Exploring boundaries through interior space”.

The concept is implemented through the design of movable screens operating on two systems. Through movement and placement, the screens are able to provide a transparency continuum between spaces. From very transparent to very opaque the spaces range in function and guide its occupants from most public to most private.
