

Application For Terminal Facility License

Please complete this form in the accordance with the instructions to ensure the proper handling of your application. Print or type unless otherwise noted. You must submit the application fee along with this form.

DEP USE ONLY	
Rec'd by _____	
Date _____	
STT/J _____ STX _____	
Application No. _____	

Part I: Application Type

Enter a check in the appropriate box identifying application type.

This application is for (check one):

A new license

A renewal of an existing license

A modification of an existing license

If other than new, provide existing license number: _____

Part II: License Fee Information

Each registrant shall obtain from DPNR DEP a license for each of its terminal facilities in the territory and shall pay an amount; not to exceed five hundred (\$500) dollars, determined by DEP upon the basis of the total capacity of the terminal facility. In addition a two hundred and fifty (\$250) dollars permit processing fee. DEP will not process an application unless the required fee has been paid.

Part III: Applicant Information

1. Fill in the name of the applicant(s) as indicated on the Permit Application Transmittal Form

Applicant: Little St. James Island

Phone: 340-775-8100 ext.: _____ Fax: 340-775-8134

Enter a check mark if there are co-applicants. If so, label and attach additional sheet(s) with the required information as supplied above.

2. List primary contact for departmental correspondence and inquires, if different.

Name: Brice Gordon

Mailing Address: 6100 Red Hook Quarter B-3

City: St. Thomas State: VI Zip Code: 00802

Business Phone: 340-513-9855 ext.: _____ Fax: 340-775-8134

Contact Person: Brice Gordon Title: Manager

Part III: Application Information (cont.)

3. List attorney or representative, if applicable:

Firm Name: _____
Mailing Address: _____
City: _____ State: _____ Zip Code: _____
Business Phone: _____ ext. _____ Fax: _____
Attorney Name: _____ Title: _____

4. List the owner(s) of the facility to be licensed.
Please enter a check mark, if additional sheets are attached.

Name: LSJ, LLC
Mailing Address: 6100 Red Hook Quarter B-3
City: St. Thomas State: VI Zip Code: 00802
Business Phone: 340-775-8100 ext. _____ Fax: 340-775-8134
Contact Person: Brice Gordon Title: Manager

5. Identify the operator and alternate operator of the terminal.

Operator Name: Arran McGinnis
Mailing Address: 6100 Red Hook Quarter B-3
City: St. Thomas State: VI Zip Code: 00802
Business Phone: 340-775-8100 ext. _____ Fax: 340-775-8134

Alternate Operator Name: _____
Mailing Address: _____
City: _____ State: VI Zip Code: _____
Business Phone: _____ ext. _____ Fax: _____

6. Identify the terminal manger, if different than the terminal operator.

Name: _____
Mailing Address: _____
City: _____ State: _____ Zip Code: _____
Business Phone: _____ ext. _____ Fax: _____
Title (if different): _____

Part III: Applicant Information (cont.)

7. Identify the Qualified Individual and Alternate Qualified Individual of the terminal (if different than Operator and Alternate Operator list in letter E).

Qualified Individual Name: _____

Mailing Address: _____

City: _____ State: _____ Zip Code: _____

Business Phone: _____ ext. _____ Fax: _____

Alternate Qualified Individual Name: _____

Mailing Address: _____

City: _____ State: _____ Zip Code: _____

Business Phone: _____ ext. _____ Fax: _____

8. List any other engineer(s) or consultant(s) employed or retained to assist in preparing the application or in designing and consulting the facility. Please enter a check mark if additional sheets are attached.

Name: Jay Swindel - Wilson Environmental

Mailing Address: 9613 Maribelle Way

City: Houston State: TX Zip Code: 77055

Business Phone: 800-469-0799 ext. _____ Fax: 713-205-7005

Contact Person: Jay Swindel Title: _____

Service Provided: Engineer

9. Identify cleanup any organization(s) to which the owner or operator of the facility belongs to.

Name: St. Thomas, St. Croix Waste Management

Mailing Address: _____

City: _____ State: _____ Zip Code: _____

Business Phone: 340-643-4471 ext. _____ Fax: _____

Contact Person: Tyson Title: _____

Service Provided: Pick up waste oil

Part IV. Site Information

A. Name of Facility, if applicable: Little St. James Island

Street address or Description of Location: Private Island

City: _____ State: VI Zip Code: _____

Latitude and longitude of the exact location of the point where product enters the terminal in degrees, minutes, and seconds.

Latitude: 18 18 6 Longitude: 64 69 30

Method of determination (check one):

GPS USGS Map Other (please specify):

If a USGS Map was used, provide the quadrangle name:

Part V. Supporting Documents

Please enter a check mark by the attachment as verification that all attachments have been submitted with this license application form. When submitting any supporting documents, please label the documents as indicated in this part (e.g., Attachment A, etc.) and be sure to include the applicant's name as indicated.

Attachment A: Applicant Compliance Information Form

Attachment B: Copy of any field survey conducted to identify the presence of any endangered, threatened or special concern species.

Attachment C: Spill Prevention Control and Countermeasure (SPCC) Plan

Attachment D: Detailed Site Plan

Attachment E: Facility Inspection

Attachment F: Facility Response Plan(s)

Attachment G: Spill Containment and Removal Equipment Listing

Attachment H: Terminal Operation Manual

Attachment I: Terminal Facilities required filing bond

*LITTLE ST. JAMES ISLAND
ENVIRONMENTAL BASELINE STUDY*

A Report to: USVI Coastal Zone Management

For: L.S.J. LLC

September 2007

2.5 Vegetation

A intense vegetative survey was conducted over an 18 month period to asses the flora and fauna of the island. The vegetation and species composition of the island is typical of an east-facing, semi-arid Caribbean island and closely resembles the vegetation found on the east end of St. John. There are approximately 100 native species present on the island. One species is listed on the Federal or Territorial Endangered Species list, and because of its habitat on steep sloping grassland and rocky outcrops, it is under no immediate threat. The island has never been occupied by grazing animals and is also free of some of the invasive exotic plant species (Burbidge 2007). For a detailed report regarding the different types of flora and fauna located on the island in specific areas and watersheds please refer to Appendix A.

2.6 Rare and endangered Species

One rare or endangered species exists on the island and is located in areas which cannot be built on. The species is an indigenous endangered species which is not federally listed. It is a species of orchid, *Tetramicra canaliculata*. This orchid is common on select section of Little St. James, usually in association with the grass *Uniola virgata* where it grows epiphytically among the leaves and culms of the grass. The orchid also grows more sparsely in watersheds C and D. This species thrives in areas which are steep, grass covered, or rocky hillsides. For more information regarding this endangered species refer to Appendix A. (Burbidge 2007)

2.7 Wetland Areas

Two wetland areas exist on the island in addition to the coastal wetland areas. These wetland areas are located on the north and western sides of the island. These areas consist of a small brackish pond on the north side of the island and a large salt pond located on the western side of the island.

The northern pond is located in a small depression between the beach and the foot of the hill. The pond is a ephemeral storm water retention pond that collects run-off from the surrounding hills. This pond becomes dry several times a year, however on isolated occasions waves do wash into the pond and the salt concentration is maintained, varying with the collection of rainwater. The salinity has been measured and indicates that the pond is classified as brackish water. Vegetation surrounding this pond is sparse. Sedges and Bermuda grass grow on the western end of the pond only when rainfall is sufficient (Bioimpact 2006).

The western pond is a large salt pond separated from the bay by a cobble beach. It holds seawater year round and contains red, white and black mangroves. The mangrove fringe while not being very dense does offer habitat benefits which are not present in the northern pond. Three sides of the pond are bordered by hills (Bioimpact 2006). Upland erosion has caused some sedimentation deposits into the pond caused by stormwater run-off. This pond also receives run-off from the gut that runs near by. For more detailed descriptions of these ponds and the surrounding areas refer to Appendix A and C.

Part VI. Applicant Certification

The applicant *and* the individual(s) responsible for actually preparing the application must sign this part. An application will be considered incomplete unless *all* required signatures are provided.

"I have personally examined and am familiar with the information submitted in this document and all attachments thereto, and I certify that based on responsible investigation, including my inquiry of the individuals responsible for obtaining the information, the submitted information is true, accurate and complete to the best of my knowledge and belief.

I certify that this application is on complete and accurate forms as prescribe by the Commissioner without alteration of the text."
