## A VILLA IN JERUSALEM

Situated in the heart of old city Jerusalem, this existing three story structure was renovated and transformed into a beautiful 6 bed - 6 bath townhouse. A fourth floor was added to the existing structure featuring a bedroom enclosed in glass walls with an outdoor rooftop lounge. The project involved gut renovation of the existing interiors, selecting new local materials and finishes, and custom furniture, rugs, hand painted wall finishes and fixtures by artists from around the world. Attention to detail and careful coordination with vendors and contractors on site as well as artists across the globe led to creating a beautiful and modern vacation home for the client. This project was completed in 2014.

Developed with Robert Couturier Inc.

## COBBLE HILL BROWNSTONE

A historic brownstone located in Cobble hill with dated interiors was gutted and transformed into an open airy space with classic modern inspired style while preserving the historical aspect and architectural details of the interior and exterior. This project was featured in the 2014 holiday issue of *New York Cottages & Gardens*.

### MID-TOWN WEST APARTMENT

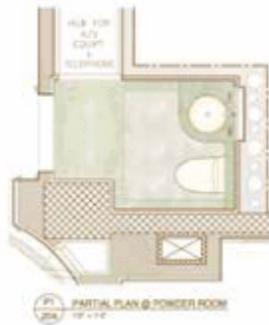

Located in the iconic Trump Tower at One central Park west, this apartment represents the the granduer and opulence of the Trump name. From luxury materials and finishes to custom hand painted wall papers, all details were carefully selected and then rendered into floor plans and elevations prior to client approvals. This project is currently going through construction and is in the final finishing stages.

**HAZE**  
MIAMI, FL  
SPRING 2010

This project is entirely conceptual and a revit experiment. The concept was to develop an iconic hotel in Miami that caters to young and dynamic demographic of the city. All 2D, 3D drawings and renderings have been developed in Revit and enhanced in Photoshop.
