Legend + Normal - Reduced ? Absent I Inconclusive A Acute C Chronic

Tech Limits:

Interpretation:

Right: Normal compressibility of the deep veins in the right lower extremity.  
No evidence of venous obstruction of the right lower extremity.  
No evidence of valvular incompetence of the right lower extremity.

Left: Normal compressibility of the deep veins in the left lower extremity.  
No evidence of venous obstruction of the left lower extremity.  
No evidence of valvular incompetence of the left lower extremity.

Impression:

Right: No evidence of deep vein thrombosis or venous obstruction in the right lower extremity.  
No evidence of valvular incompetence (chronic venous insufficiency) of the right lower extremity.

Left: No evidence of deep vein thrombosis or venous obstruction in the left lower extremity.  
No evidence of valvular incompetence (chronic venous insufficiency) of the left lower extremity.

Comparison:
