HI Kevin...quick question re the one day fishing license...we wanted to wait and purchase the license the day of our trip...is this ok? we just print it out...we don't wait for an actual card to arrive in the mail, correct? We want to wait to purchase for just in case the weather is bad and we can't go out we don't want \$50 a couple...it appears to me waiting and printing day of should be fine (but I did read that one of the license's takes 20 days to receive...) So just want to make sure!

Thanks, Lesley Groff
