I'll take a look.

It sounds like it's not waking from sleep/power-save mode. If it happens again, you might try hitting the power or copy buttons to wake it up.

Hi James...the printer here at 71st is acting up! It did the last time I was here as well...it keeps saying it is not connected...so I unplug it...then plug back in....it works! ???

I can keep doing this of course, but thought the next time you are here you might give the printer connection a check up!
