---

So you know... I didn't get a chance to upgrade your computer at the office yesterday. They surprised me with the printer upgrade & it's setup and configuration.

I did do the prep work on it, removing older software, so it should be ready to go the next time I'm there.

100% agree I should wait for the following week! Thank you for your forward thinking!

I think you're safe to upgrade to El Capitan, **BUT** I'd prefer if you would please wait until NEXT weekend.

My next week is pretty full with the move on Monday, and a project Rich and Darren have me doing Tuesday & Wednesday, so if something were to go horribly awry I wouldn't be able to help — and when I can't go fix something if I need is usually when it breaks (superstitious, I realize).

Hi James...do you think it is ok for me to now update my computer to the El Capitan? I love it at Jeffrey's...I noticed my computer in the office has not been updated (I was in yesterday) but the girls say you are coming on monday to move the computers and update...

Just didn't know if I need you to do the update here or if I can do it now? bugs fixed? thoughts?

Lesley
