### FlightAware at NBAA15!

Hello,

[FlightAware](#) is looking forward to seeing you at NBAA as well as showing you all our exciting new features we have available that we will be demonstrating!

#### Premium Weather

All maps across FlightAware can now support hundreds of multi-continent, altitude and time based premium weather layers to increase situational awareness during flight dispatch and flight following. Premium weather, provided by Schneider Electric, offers global weather radar, current and forecast global turbulence, current and forecast global icing, as well as winds and temps aloft. These features will help improve flight planning and safety by increasing weather awareness.

#### FlightAware TV

We will also be displaying [FlightAware TV](#) at NBAA. FlightAware TV displays a large, HDTV, real-time map for general aviation flights, airline flights or an airport. FlightAware TV is only USD90 per month, however if you are a current SUB or Global customer, it is USD45 per month.

If you are current global customer, you can now add on premium services from your portal. You have the option to add an HDTV Map, Premium Weather, Monthly or Annual flight logs.

Please feel free to email or call me with any questions. Stop by **booth C10326** to see all of our new products or if you have any questions regarding any of your services.
