Hi Joe and Happy Halloween!! Boo!

Thank you for the below...I will pass along to Jeffrey...too bad he is in that 20+ samples...

Hi [REDACTED],

We have high quality sequencing data on over 60% of our YPO people but the data is still being analyzed.

Unfortunately, Jeffrey's sample is among the 20+ samples that need to get resequenced due to some issues with the quality of the DNA extracted from saliva. Those samples will take another 2-3weeks.

I have been getting personal medical history and family medical history from YPO members to customize their medical analyses. If Jeffrey wants to voluntarily provide any of this by phone or email, I can work that info into his analyses once the data is available.

Thanks,
Joe

Morning Joe. Might you have an update for Jeffrey? Please let me know any information you might have so I may pass along.

Thank you,
[REDACTED]
