Excellent! I will relay to Jeffrey...

I don't want summer to end! (but Fall is always nice too...but you know what happens after Fall!....ugh)

Thanks, [REDACTED]. The sequencing should be done by early to mid-October. Most analyses and return of results should be done before Nov. (but it's not easy to put a firm date on this as it depends on what we actually find). In about 2 weeks, after final irb review, I'll connect with you to schedule a time to talk briefly with Jeffrey (30min or less).

He'll be able to provide any personal or family medical history at that time - which will "personalize" his interpretation by focusing his analyses on anything he or his family may specifically be at risk for. (Providing this is purely voluntary though.)

Hope you are having a good end of the summer,
Joe

Hello Joe! hope you had a wonderful holiday weekend! Wanted to touch base with you ...how are things progressing? Any firm date for on the TAT for the sequencing component? Or any other news to relay to Jeffrey?

thanks, [REDACTED]

It's no problem. Sorry it took awhile to get back to you. I was hoping to get more of a firm date on the TAT for the sequencing component before replying (which I'm still waiting on).

Right - summer 2014 definitely going by fast - it's hard to believe we're in mid august already!

Joe

this is fabulous! thanks for the synopsis and will pass along to Jeffrey.

Summer is ALWAYS too short...I hope you are enjoying as well.
