Hi [REDACTED],

I'm waiting on confirmation on the turn-around-time for sequencing results but should have that tomorrow.

In about 2 weeks, I should be contacting Jeffrey and others in the initial YPO cohort to schedule everyone's pre-test genomic counseling and 2nd consent. This will happen remotely (phone or video conferencing) and takes about 30min or less.

Since Jeffrey has been waiting longer than the other YPO people - going back to his PGP enrollment - I'll prioritize getting him scheduled.

I expect to have the pilot cohort wrapped up (Ie, with most or all individuals receiving their initial results by mid-Oct or sooner).

I haven't gotten his fibroblast cell lines into the sequencing queue yet but I should have that off sometime in sept. Jeffrey will be the first to have exomes on 2 cell lines/DNA sources available. So, that analyses will be interesting and unique compared to what the others are getting done.

More to follow soon. Say hi to Jeffrey for me and let me know if any of the above needs clarification.

Hope you're having a good summer,
Joe

Hi Joe...could you please provide an update for Jeffrey re the work you are doing for him? He is asking...even if it is that you have no update, could you let me know so I may pass along?

Thank you,

[REDACTED]
