Sorry for the delay in getting this to you, yesterday was rather full for me.

Rich,

I've created two saved carts for you for each configuration. If you go to <http://store.apple.com/us> and click the Cart link in the upper right (below the grey bar) you should have an option for Saved Carts. Sign in with your [REDACTED] account & you should see two carts, named for each recipient.

Also attached are PDFs of the configurations.

On John's, he's requested an Apple Superdrive USB DVD-R drive. These are a waste of money, most people get them expecting that they'll need them to install software, etc and never use them.

If we're going to buy him a USB burner, we should get this one from Amazon, it's half the price, better built and pretty much the same mechanism inside:

<http://www.amazon.com/Samsung-Portable-External-SE-218CB-RSBS/dp/B00DBV28TG/>

Lesley,

What is the internet & network setup at your new place? Do you have wireless or ethernet networking already set up, or would you like me to help with those as well?

Thanks,

Hi James! Jeffrey has approved a new desktop computer for me at my home and said I can have you come out and install for me in CT. Could you please put together an order for the latest and greatest from Mac? I would like the large monitor also. Once you get the order together, send to me and I will purchase the items and ship to my new home. Then we can organize you to come up and spend the day getting me up and running with computer, printer, scanner, etc! I am moving this wed so if we could get this ordered today it would be super. Then hoping I will get delivery early next week and get you too! Thanks, Lesley
