Robert,

Do you want both the beams and rafter to be 2x10s, or do you want 2x10 beams and 2x8 rafters?

Thanks,

William Hayes

William,

Thanks for the quote. I was thinking that 10 inch columns would look more substantial and I think 2x10 rafters would also be better. What would the price of that kit be?

Good Morning Robert,

Thank you again for your interest in our cellular PVC pergola systems. Working with your 16x16 concrete patio, I would recommend a 14x14 column footprint pergola leaving you around 5"-6" of clearance from the edge of the patio to the edge of the column's base. Attached is a generic drawing of our 14x14 freestanding pergola. Your requested pergola will have 8"x8' square fiberglass columns instead of the pictured 10"x8' round fiberglass columns.

Your delivered price for a 14x14 freestanding cellular PVC pergola is \$8,710.75. This price includes: 4 - 8"x8' square fiberglass columns, 4 - pergola column mounting kits, 4 - 18' beams, 13 - 18' rafters, and all necessary hardware. Our payment terms are 50% down and the balance due prior to shipping. We will send digital photos of your completed pergola before asking for final payment. Payment can be made with check or credit card.

Please feel free to contact me if you have any questions.

Thanks,

William Hayes
