Updated for Friday's close. +2.9% for the week.

To correlate with 97-99 and 03-06 periods, could you list a few of the key common features of the market today with 97-99 and 03-06? Also, what is different today and what does that mean for potential returns.

EK

In the powerpoint and the intr letter. We should highlight the stage of the economic recovery, the FOMC , and the latter part of the bull market and correlate it to the 97-99 time frame +1000 percent and 03-06. 420 percent. Send me the portfoilio with the weekly performance. Should have been up nicely.
