Thanks Leslie. I take it you didn't get sick. You guys should take Occilliococcillium when you feel a cold coming up.

> Jeffrey , Great catching up with you. I look forward to making a potload of money together. The shipping co and the alt energy co, we can get 9.9 percent each of for about 6-7mm each. 600 mm in assets in the former and 1bn sales and 40-80mm in earnings in the latter. The asset based transport co. 5.5bn in sales and 420mm EBITDA next year we can get 9.9 percent for 20mm. We can do that on margin. 10mm. Plus I have about 6 additional companies that we should put 1mm into, which each have 20-50X potential. All these companies are trading at pennies on the dollar. With 30-35 mm we can be the dominant shareholders in 6-7bn in sales and over 3bn in assets. I am looking forward to working with you . Let me know how to proceed. As far as the fees, I am flexible but suggest the higher the return , the higher the fee. I am the best alpha guy on the street. As you see I made 1000 percent 96-99 and 430 percent 03-06. We are at that phase.
