That is wonderful news, since my staff are motivated by samples that are part of research. So next steps. Since this is a rush on my end, it will be a rush at your end as well. Jeffrey needs to sign up here:

<http://www.personalgenomes.org/signup.html>

There are a few tedious steps -- for which I apologize in advance. Perhaps someone on your staff can help with most of them. If we can't do it this Friday, we will at least aim for a near-future trip.

Best wishes.

Jeffrey says it doesn't matter if it is public. Makes no difference to him. Let me know what you can do! Thanks, Lesley

Does he want this done as part of PersonalGenomes.org research or more privately?

I'll see what I can set up.

Hello George...Jeffrey is asking if he could have some skin cells taken while he is up at Harvard on Friday so that he may have his genome done...

Might this be possible to set up?

Please let me know!

Thanks, Lesley
