"Some people think of me as just plain lucky. I would like to say, however, that a man might be walking around lucky and not know it unless he tries." Arnold Palmer after winning the 1964 Masters

- Cows came to America with the Pilgrims. They arrived in the Jamestown colony in 1611.
- Cows can live 25 years. You can guess the age of a cow that has horns by counting the number of rings on the horns. Before counting, make sure the horns belong to a cow.
- A cow stands up and sits down about 14 times a day.
- A cow produces around 200,000 glasses of milk in her lifetime.
- The record milk production for a single cow in a year is 55,660 pounds of milk.
- Cows can detect odors up to five miles away.
- Cows are able to hear lower and higher frequencies better than humans.
- Cows have almost total 360 degree panoramic vision and are able to see colors, except red. So a bull, in a bullfight, doesn't see the red of the toreador's cape – just the movement of the cape.
- Cows can drink up to 35 gallons of water a day.
- Dairy cows can produce up to 125 lbs of saliva a day.
