Happy Thanksgiving, Lesley!!!!!!!

Just sent it to JEE and forgot to Cc you -

U might like that last Youtube link at the bottom!

:-)

Mark

Subject: Happy Thanksgiving

To: Jeffrey Epstein <jeevacation@gmail.com>

Dear Jeffrey,

I am thinking of you as this special Holiday begins here in Malibu and want to give you my thanks for all you've done for my colleagues and me this past year and in previous years at The Institute for Music & Brain Science. Your generosity and intellectual interest in our interdisciplinary work at the interface of Neuroscience and the Arts made it possible for my colleagues and me to:

(1) engage Massachusetts and California law firms on the business of moving The Institute 4942(j)3 to California;

(2) readily accept the invitation of European auditory neuroscientists to give two talks (one the closing lecture) plus a workshop at the Neuroscience of Music Symposium in the Swiss Alps (<http://lcn1.epfl.ch/page-76731-en.html>);

(3) complete and publish in PLoS One a paper on the role of auditory cortex in loudness perception and on the neuroanatomical dissociability of sensation and discrimination

(<http://www.plosone.org/article/info%3Adoi%2F10.1371%2Fjournal.pone.0044602>);

(4) speak at the PainWeek 2012 annual conference about the beneficial effects of music on pain in premature infants undergoing medical procedures - work you previously supported that a team of Institute-affiliated faculty and students published last year in the journal Music & Medicine (attached). I am attaching a PainWeek magazine article covering that talk for you.

(5) begin revising The Institute website (<http://www.BrainMusic.org>)

On a personal note: I miss you!

Happy Thanksgiving,

Mark

P.S.

Some links you might find interesting - remember when I called you from Aspen?
