Subject: Welcome to iCloud.

Date: Wed, 01 Aug 2012 16:33:39 +0000

Dear [REDACTED]

Welcome to [iCloud](#). The Apple ID for your iCloud account is [REDACTED] and it's what you'll use to get your iPhone, iPad, iPod touch, Mac, and PC set up. Just follow [these instructions](#) and you'll be up and running in no time.

Once iCloud is set up, it stores your content and wirelessly pushes it to all your devices. For example, buy a song with iTunes on your computer, and it will appear on your iPod touch and iPad. When you snap a photo on your iPhone it will automatically be sent to your iPad. You can start creating a Pages document on your iPhone, and put the finishing touches on it from your iPad. There's no need to dock or sync to your computer. With iCloud, it just works.

We hope you enjoy using iCloud.

Sincerely,

Apple

iCloud requires iOS 5 on iPhone 3GS or later, iPod touch (3rd and 4th generation), iPad, or iPad 2; a Mac computer with OS X Lion; or a PC with Windows Vista or Windows 7 (Outlook 2007 or 2010 or an up-to-date browser is required for accessing email, contacts, and calendars). Some features require a Wi-Fi connection. Some features are not available in all countries. Access to some services is limited to 10 devices. Previous purchases may be unavailable if they are no longer in the iTunes Store, App Store, or iBookstore.
