"Matson is the first artist to have taken scanning into the realm of high art." (Phaidon Editors, in "Plant")

JE,

I want to send you a copy of the gorgeous new Phaidon book, "[Plant: Exploring the Botanical World](#)", a "curated selection of 300 of the most beautiful and pioneering botanical images ever", including botanical works from cave-dwellers 9500 years ago to the murals of ancient Greece, to Linnaeus, da Vinci, Pierre-Joseph Redoute, Darwin, Emily Dickinson, van Gogh, O'Keeffe, Ellsworth Kelly, Mapplethorpe, and...Katinka Matson.

In addition to inclusion of Katinka's iconic image "[Spiders](#)" in the volume, she is featured by Phaidon in the first serial article in major publications such as [The Guardian](#), and [LIFO](#), the largest news site in Greece, which selected "Spiders" as the lede image (viewed on a desktop browser, below). And take a look at her recent work on her new website: katinkamatson.com.

Where shall I send the book?

Best,

JB
