Great. Thank you for all of this.

There's not really a default setting for this.

Everyone usually ends up getting the 13" MacBook Air, but that line is on its way out and hasn't been updated forever.

I'd suggest:

Touch Bar and Touch ID
2.9GHz Processor
512GB Storage
2.9GHz dual-core Intel Core i5 processor
Turbo Boost up to 3.3GHz
8GB 2133MHz memory
512GB PCIe-based SSD1
Intel Iris Graphics 550
Four Thunderbolt 3 ports
Touch Bar and Touch ID
\$1,999.00

This is the "best" option for the new 13-inch MacBook Pros, and is in-stock in the UES Apple Store currently.

To purchase, please email & cc Rich / have Rich email Mark Brophy [REDACTED] and have him put it on the account for HBRK Associates. Let Mark know who will be picking up the machine (they'll need ID). I'm not 100% sure that Rich has you on the authorized purchasers list, so you may want to check with him.

Purchases on the account add to our annual spending goal, the more we spend in a 12 month period, the more of a discount Apple gives us, so we want as much as possible to go through the account.
