---

Dear members,

### **Now Offering Weekend House-Calls in the Hamptons from Memorial Day to Labor Day**

PPC is proud to serve its members in the Hamptons this summer by providing home medical visits from our best-in-class ER physicians & providers on weekends from Memorial Day through Labor Day. If you feel unwell or have suffered an injury, our staff can travel to your home to provide care for an additional fee. Simply call our regular hotline, [REDACTED], and our medical team will be there to help.

Home treatment may include administering IV fluids, diagnosing illnesses, treating injuries, and running blood-work. If you require further care, we enable transport back to New York City via private car, ambulance or helicopter, where you may receive treatment and imaging at our primary facility, access to our network of specialists, and use of our VIP hospital relationships.

Our mission is to provide our members with both excellent and convenient medical care, which is why we have developed this new service. In the unfortunate event that you require medical attention on the island this summer, we hope it proves useful.

I've included a little more information about the Hamptons and other elements of our service below.

Please call at your convenience on [REDACTED] with any questions.

Sincerely,  
PPC Membership Team
