Hi Andrew...just following up...do you think there is something we can do to help [REDACTED] with her problem? [REDACTED]

Hi Andrew...[REDACTED] in 2G has brought to our attention her issue with the AC unit and pigeon droppings!...she says pigeons are pooping all over the AC unit and when she turns it on she is worried about toxic fumes coming inside the apartment...is there anyway to build some sort of awning or something above the unit to shield the AC unit from collecting this waste? I don't know if others have the same problem or what can be done but she says its terrible...

Please let me know your thoughts...cleaning it off every so often is not really a solution to the problem...

Thanks, [REDACTED]
